Block an IP Address
Allow an IP address
Disable directory browsing
Adding MIME Types
Change default directory page
Protect .htaccess files
Protect php.ini file
Preventing hotlinking
Force Caching with htaccess
Check Spelling directive

URL redirect through .htaccess file

URL rewrite helps you to hide your extension name or show different extension name like index.php can be displayed as index.html or only index or home etc.

The following code will rewrite anyfile.php to anyfile.html

```
RewriteEngine on
RewriteRule ^(.*)\.html$ $1.php
```

The following code will rewrite index.php to index

```
RewriteEngine on
RewriteRule ^index index.php
```

Few Example to create SEO friendly URL.

1. Rewrite product.php?id=1 to product-1.html

```
RewriteEngine on
RewriteRule ^product-([0-9]+)\.html$ product.php?id=$1
```

2. Rewrite product.php?id=12 to product/cat/12.html

```
RewriteEngine on
RewriteRule ^product/([a-zA-Z0-9_-]+)/([0-9]+)\.html$ product.php?id=$2
```

3. Rewrite domain.com/member.php?username=arup to domain.com/arup

```
RewriteEngine on
RewriteRule ^([a-zA-Z0-9_-]+)$ user.php?username=$1
RewriteRule ^([a-zA-Z0-9_-]+)/$ user.php?username=$1
```

4. Rewrite domain.com/users.php?id=username&page=2 to domain.com/username/2

```
RewriteEngine on
RewriteRule ^([a-zA-Z0-9_-]+)/([0-9]+)$ users.php?user=$1&page=$2
RewriteRule ^([a-zA-Z0-9_-]+)/([0-9]+)/$ users.php?user=$1&page=$2
```

Hasdeep

Hi, can you help me. I have a webpage by the name of page.php?id=1 and multiple dynamic links. I have written the following code in htaccess file:
RewriteCond %{THE_REQUEST} \?
RewriteCond %{QUERY_STRING} id=([0-9]+)
RewriteRule ^$ /page.php%1? [R=301,L]
RewriteRule ^([0-9]+)$ page.php?id=$1 [L]
Now, the problem is example.com/page.php?id=1 and example.com/1 both links are opening. I am not able to redirect automatically example.com/page.php?id=1 to example.com/1

Mydomain   Www   Links   Custom Shirt   Free website templates   Username   infolinks
